A POCKET HOME PROJECT · WEST FACING

Inside-Out.

The tree came *first*.

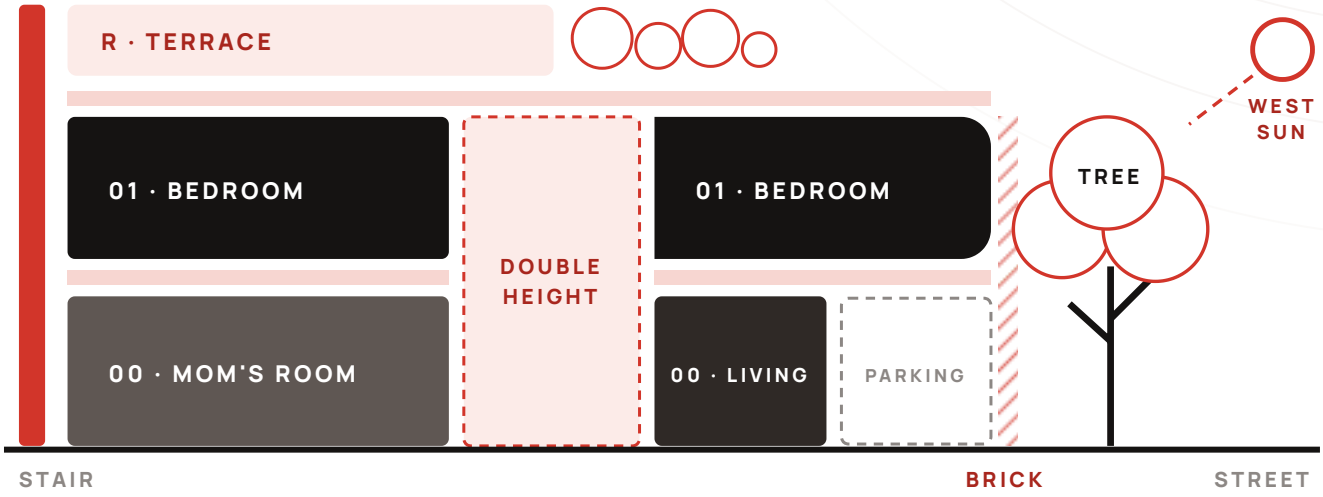

A 3 BHK family home, **with a room on the ground floor for Mom.**

PLOT	BUILT-UP	TYPOLOGY
1,200 sq.ft	2,300 sq.ft	G+1

A west-facing plot, and a *good tree.*

West is the hard side in summer. But this plot already had an answer standing in front of it. **The tree became a buffer against the summer heat,** and the house was planned around it.

A room for *Mom.*

A humble family, and one clear priority. His elderly mother has her own room on the ground floor, with no stairs in her day.

Light in the *centre.*

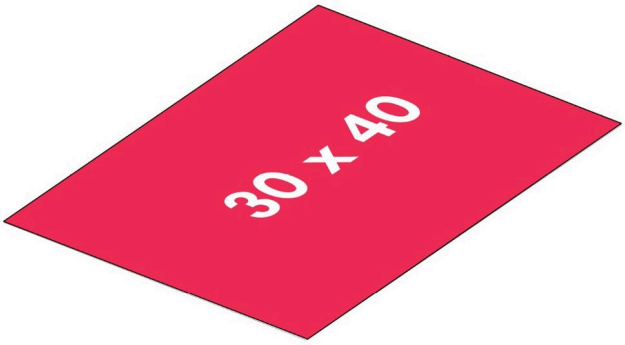

A double height at the heart of the house lets natural light into the middle of the plan.

AT A GLANCE

PLOT	BUILT-UP	CONFIGURATION	TYPOLOGY
1,200 sq.ft	2,300 sq.ft	3 BHK	G+1

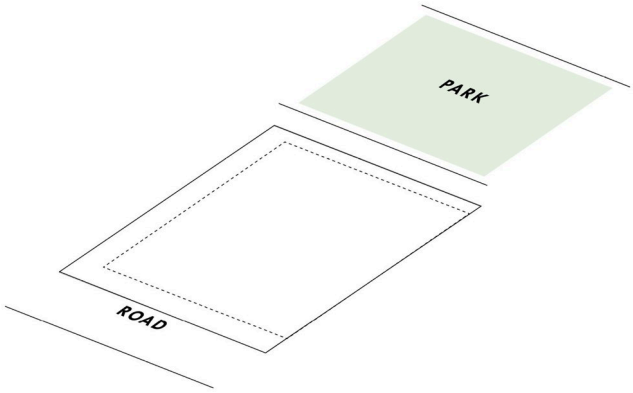

From a box to a *home.*

It starts as a plain box on a 30 x 40 plot. **Take away, add back, and the house appears.**

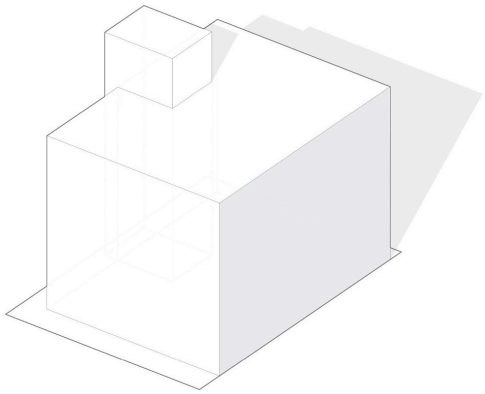

1 The plot

A 30 x 40 site, 1,200 sq.ft.

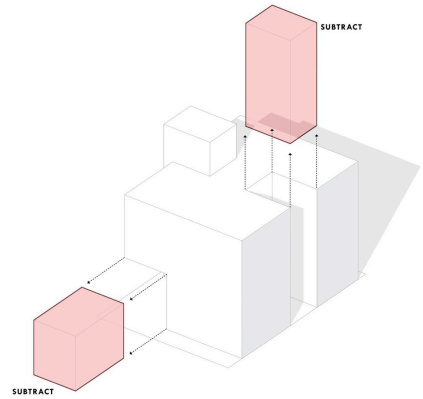

2 The context

A road in front, a park behind, and setbacks marked in.

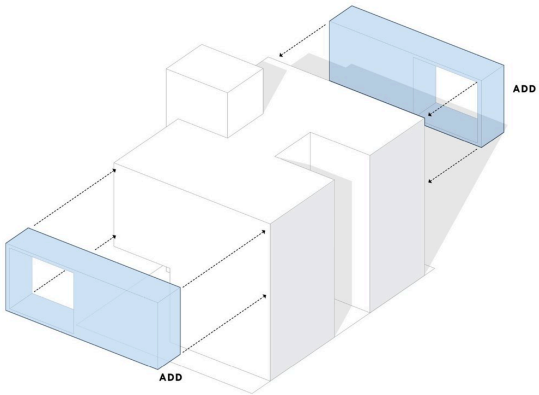

3 The box

The full volume, with a head room on top.

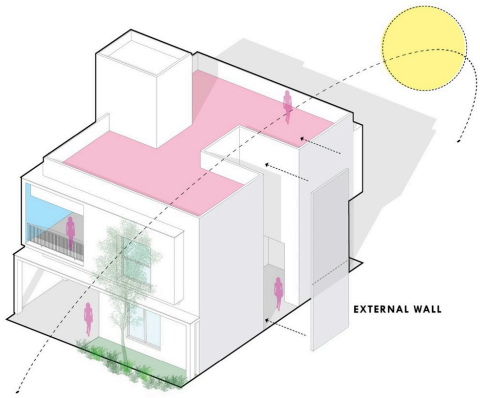

4 Subtract

One piece comes out at the front, one along the side.

5 Add

New frames go on the front and the rear.

6 The home

The external wall closes the side, and the terrace opens to the sky.

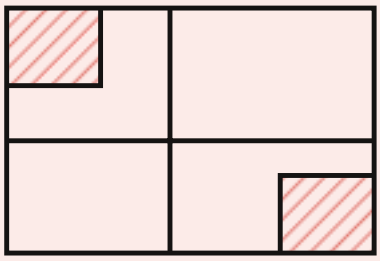

Eight things every small plot *needs.*

The same eight principles guide every Pocket Home. Here is how each one plays out at Inside-Out.

- **Light**
  The double height brings natural light into the centre of the house.
- **Wind**
  Windows on more than one side of the main rooms give air a way through.
- **Optimize**
  The car park sits under the building line, and the first floor carries more area than the ground.
- **Storage**
  Wardrobe walls in the bedrooms, and a kitchen planned around its counters.
- **Layout**
  Mom's room, the living room, dining and kitchen are all on one level.
- **Energy**
  The tree filters the west sun, and the deep balcony keeps the glass in shade.
- **Plant**
  The existing tree stays, with a street planter, a side planter and green on the balcony.
- **Maintenance**
  Brick cladding on the facade, and a paved car park that is easy to wash down.

Small plots deserve *better.*

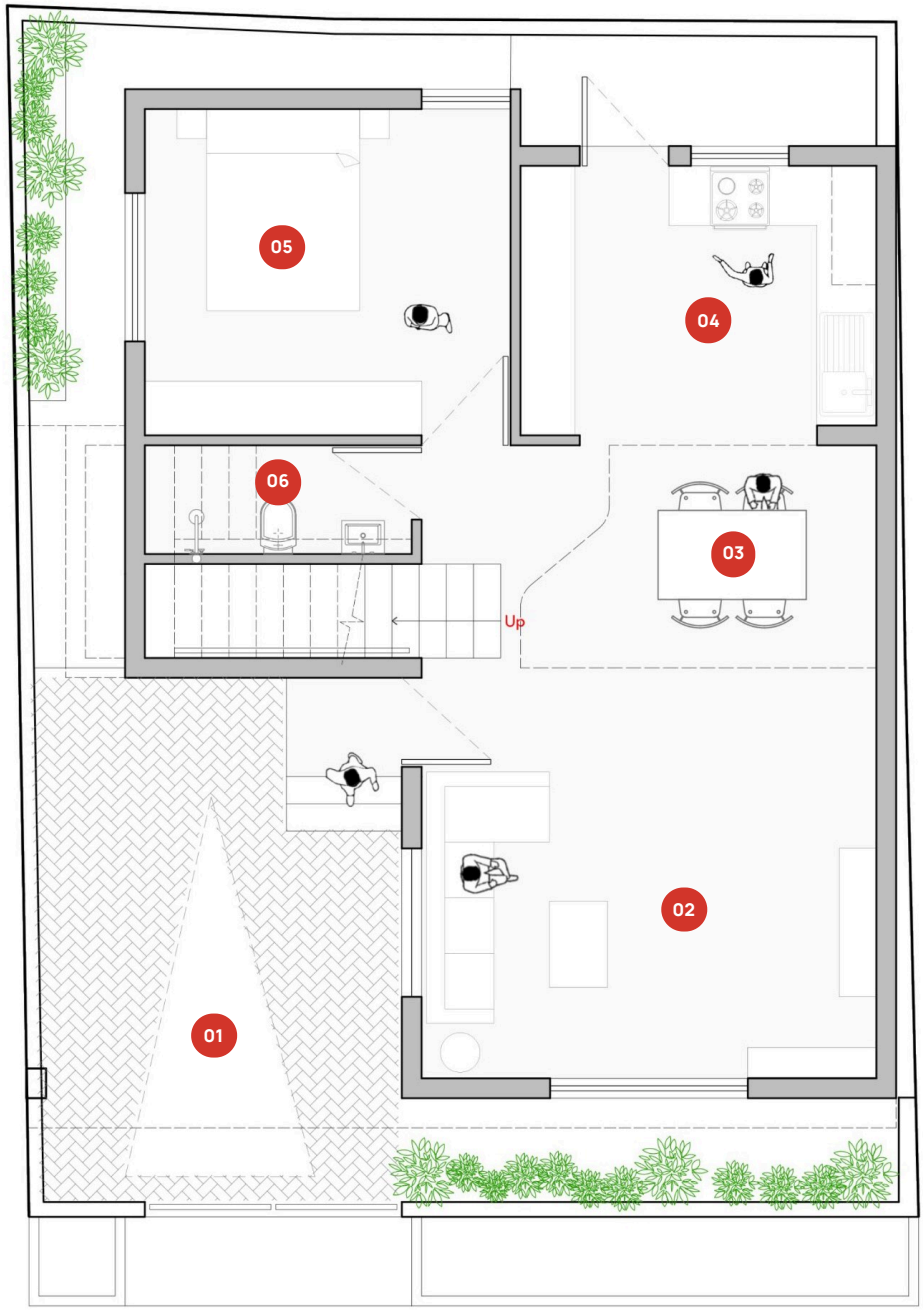

A stock plan leaves dark corners and dead passages. A plan drawn for one plot and one family puts every corner to work.

Everything *Mom* needs.

One level for her room and the family's day.

900 sq.ft
BUILT-UP

01 Car park
Behind the street gate

02 Living
Sofa, side and street windows

03 Dining
Under the double height

04 Kitchen
Side door to the yard

05 Mother's room
Ground floor, wardrobe wall

06 Toilet
Off the hall, beside her room

Dining at the centre

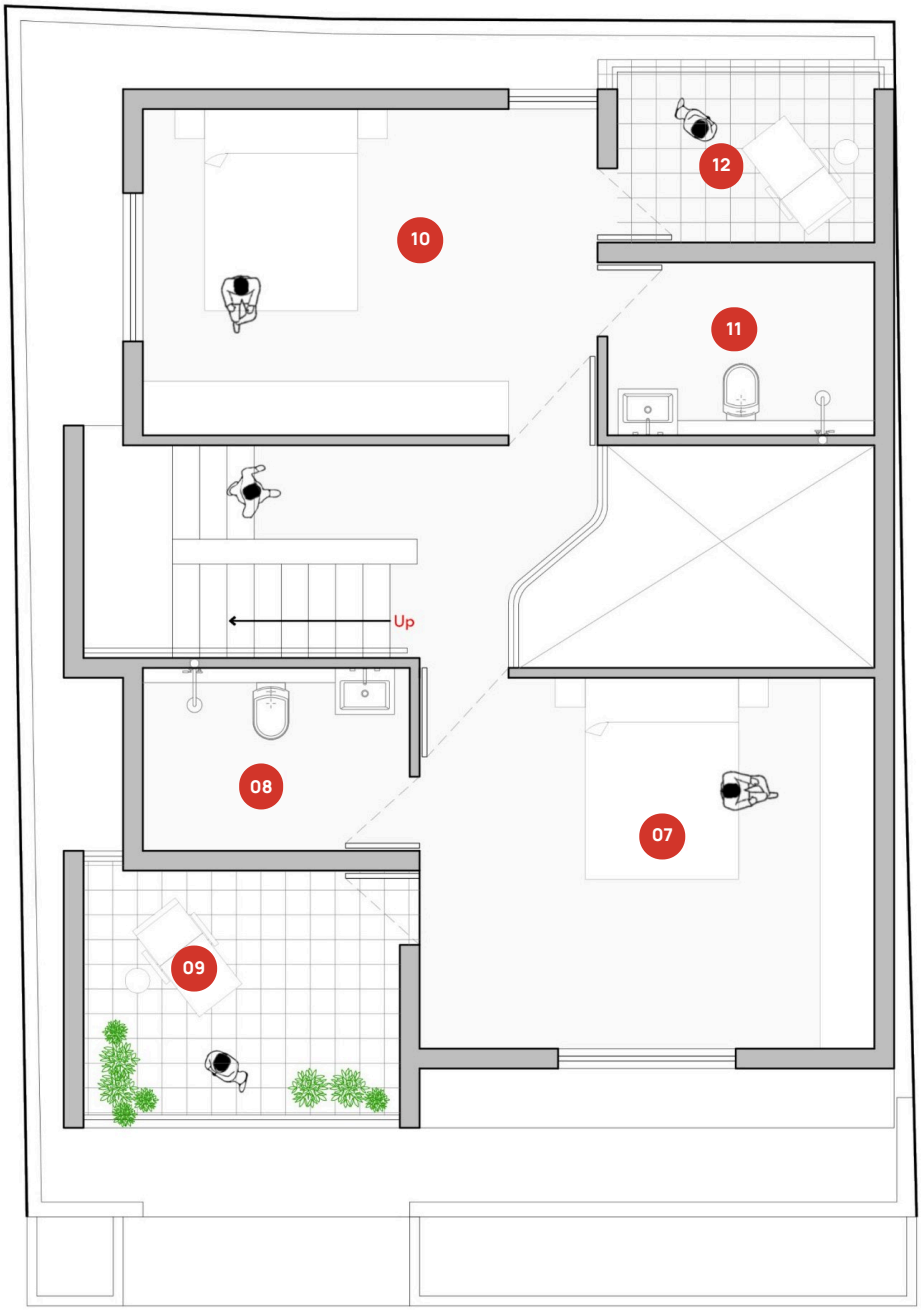

The table sits under the double height, in the brightest part of the plan.

DOUBLE HEIGHT

A bedroom at *each* end.

Two rooms, each with a toilet and a balcony, either side of the open centre.

1,100 sq.ft
BUILT-UP

07 Bedroom
Front room, street window

08 Toilet
Attached

09 Balcony
Front, planted, off the bedroom

10 Bedroom
Rear room, wardrobe wall

11 Toilet
Attached

12 Balcony
Rear, off the bedroom

Open to below

The crossed area on the plan is the double height, looking down onto the dining table.

2 BALCONIES

THE FACADE

Brick behind, so the *tree* stands out.

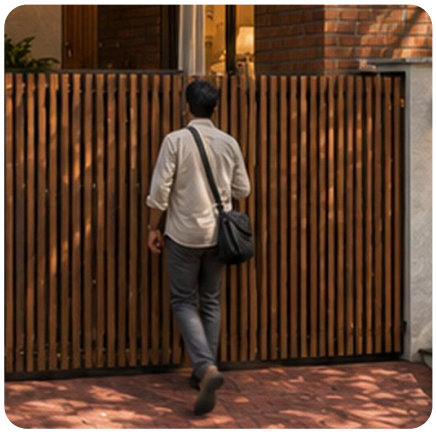

With the tree already in the foreground, a brick wall was chosen as its background, to bring out its depth.

01 THE BALCONY BOX

02 BRICK AND WINDOW

03 TIMBER SLAT GATE

ALTERNATE ELEVATION

Same home, a *second* face.

If brick cladding feels like an expensive choice, this proposal keeps the same design and changes only the elevation.

- **What stays**
  The plans, the balcony box, the timber gate and the tree.
- **What changes**
  A pale wall replaces the brick, and takes the tree's shadows instead.

We don't design.
We solve.

Inside-Out began with one tree on a west-facing plot. Tell us what is on yours.
