A POCKET HOME PROJECT · CORNER PLOT

Panorama Box.

Dark inside, *wide* open.

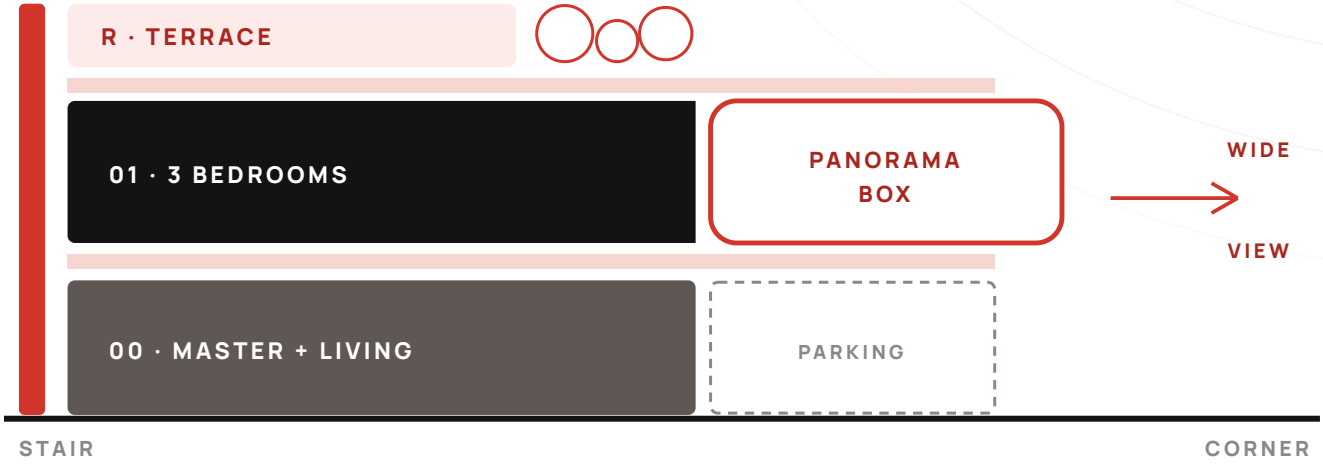

A room with a dark theme, **and a balcony that takes in the whole corner.**

PLOT	SITE	TYPOLOGY
1,200 sq.ft	Corner	G+1

One dark room, one *wide* balcony.

The site is a corner plot of 1,200 sq.ft in a developing, dense neighbourhood. **The client asked for a dark themed room with a wide open balcony.** Those two wishes led to the Panorama Box.

A corner is a gift

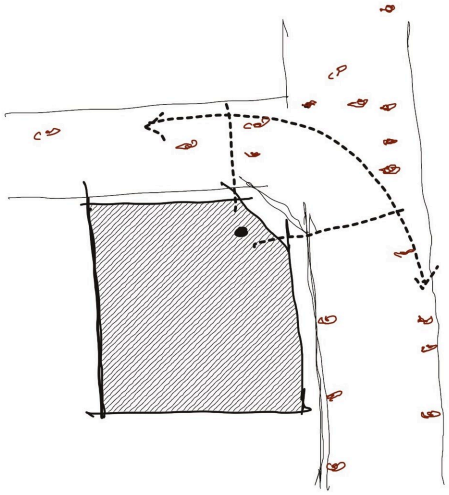

Two sides of this plot face the road. In a neighbourhood that is filling up, that is where the view will stay open.

AT A GLANCE

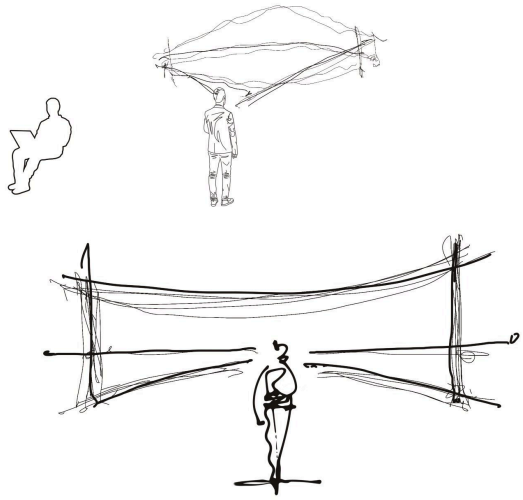

PLOT	SITE	BEDROOMS	TYPOLOGY
1,200 sq.ft	Corner	4	G+1

It began with a *frame.*

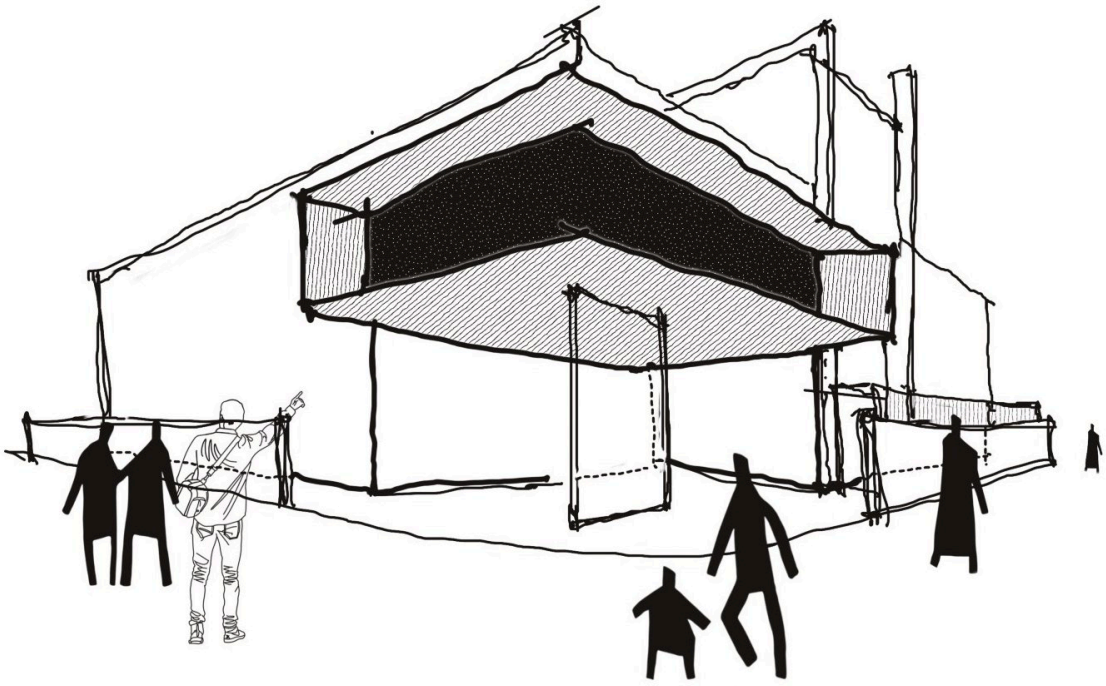

Before any plan, there was a person, a view and a simple question: **how do you hold that view?**

01 THE CORNER, AND ITS VIEW

02 A FRAME AROUND A PERSON

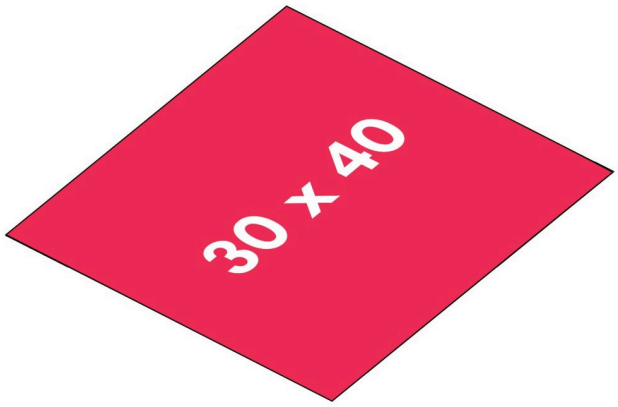

03 THE BOX ON THE CORNER

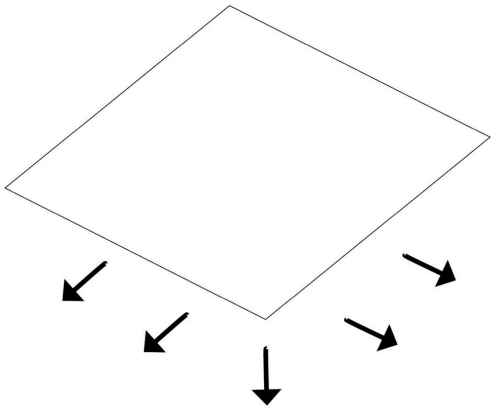

Six steps to a *view.*

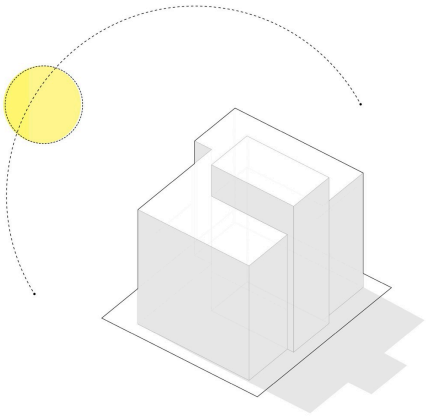

From a 30 x 40 plot to a house with life on every level.

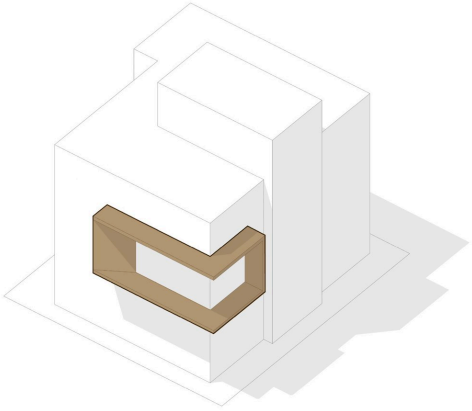

1 Site
A 30 x 40 plot.

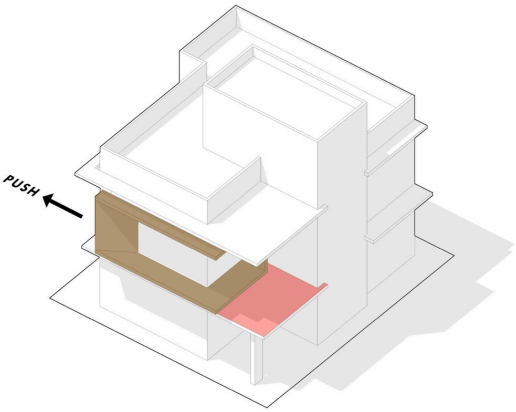

2 Maximising view
The corner decides where the house looks.

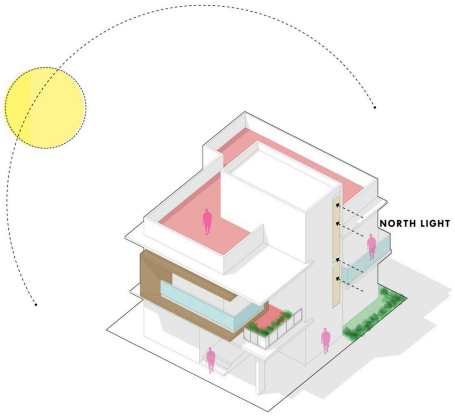

3 Program
The volumes settle on the plot.

4 Panorama Box
The box is set into the corner.

5 Creating terrace garden
The box is pushed out, and a terrace opens beside it.

6 Life
People on every level, and north light down the stair.

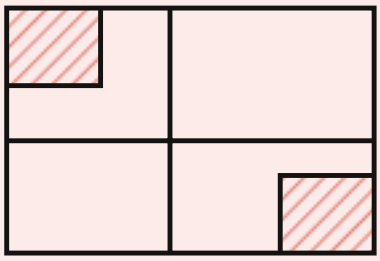

Eight things every small plot *needs.*

The same eight principles guide every Pocket Home. Here is how each one plays out at Panorama Box.

- **Light**
  Tall slit windows bring north light down the stair.
- **Wind**
  A corner plot has two open sides, so rooms get windows on more than one wall.
- **Optimize**
  The house turns towards the corner, where the view is widest.
- **Storage**
  Built-in wardrobes line the bedroom walls upstairs.
- **Layout**
  A master bedroom on the ground floor, with three bedrooms above.
- **Energy**
  The deep slab overhang shades the Panorama Box and its balcony.
- **Plant**
  A play of levels creates terraces that can house a small oasis.
- **Maintenance**
  External plaster with paint keeps the surfaces simple.

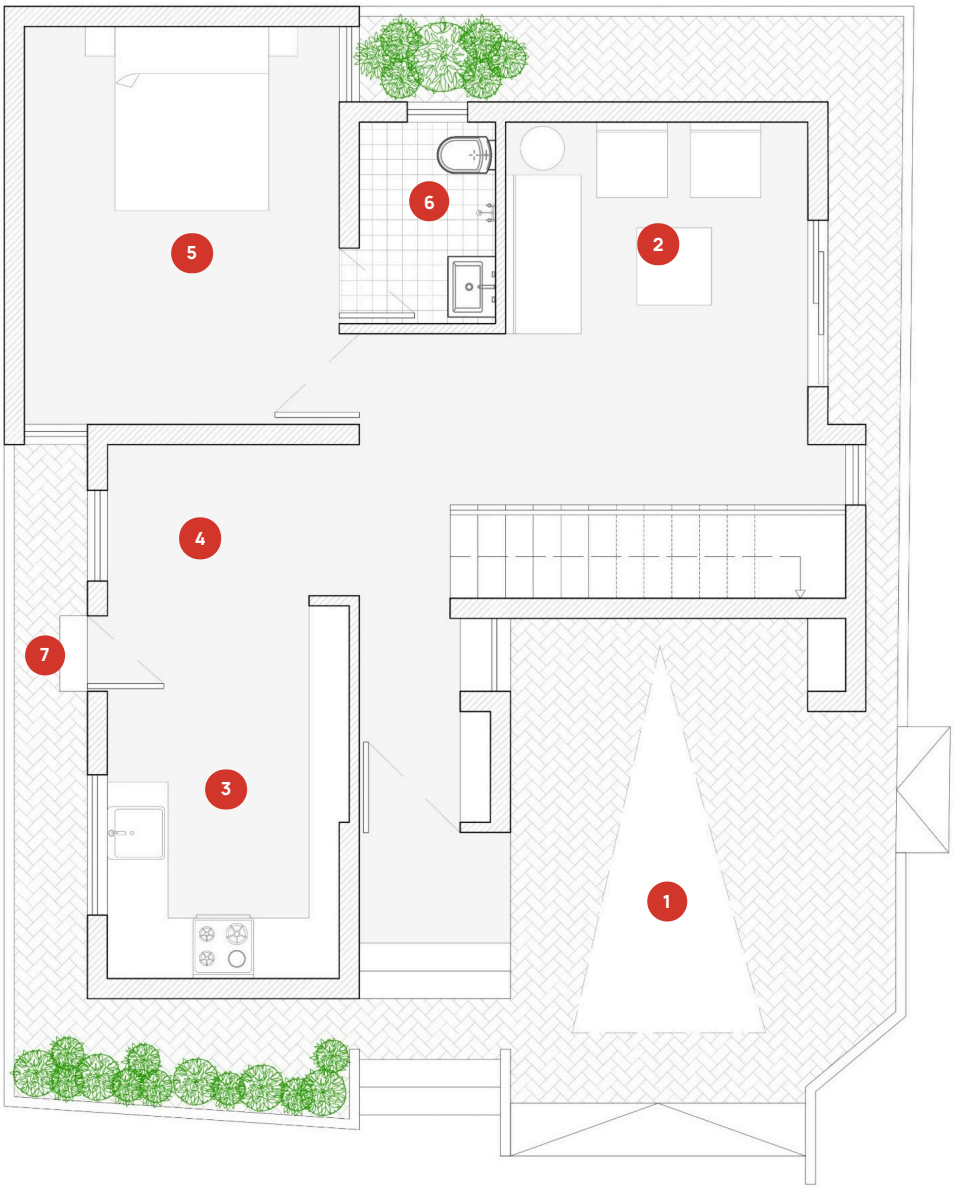

Small plots deserve *better.*

A stock plan leaves dark corners and dead passages. This one starts from a wish, and from the best corner of the site.

A *master* bedroom below.

Living, dining and kitchen, with the master bedroom on the same level.

1 Car Parking
Inside the corner gate

2 Living Room
Sofas, garden side

3 Kitchen
Long counter, side door

4 Dining
Beside the kitchen

5 Master Bedroom
On the ground floor

6 Toilet
Between bedroom and living

7 Utility
Off the kitchen, side yard

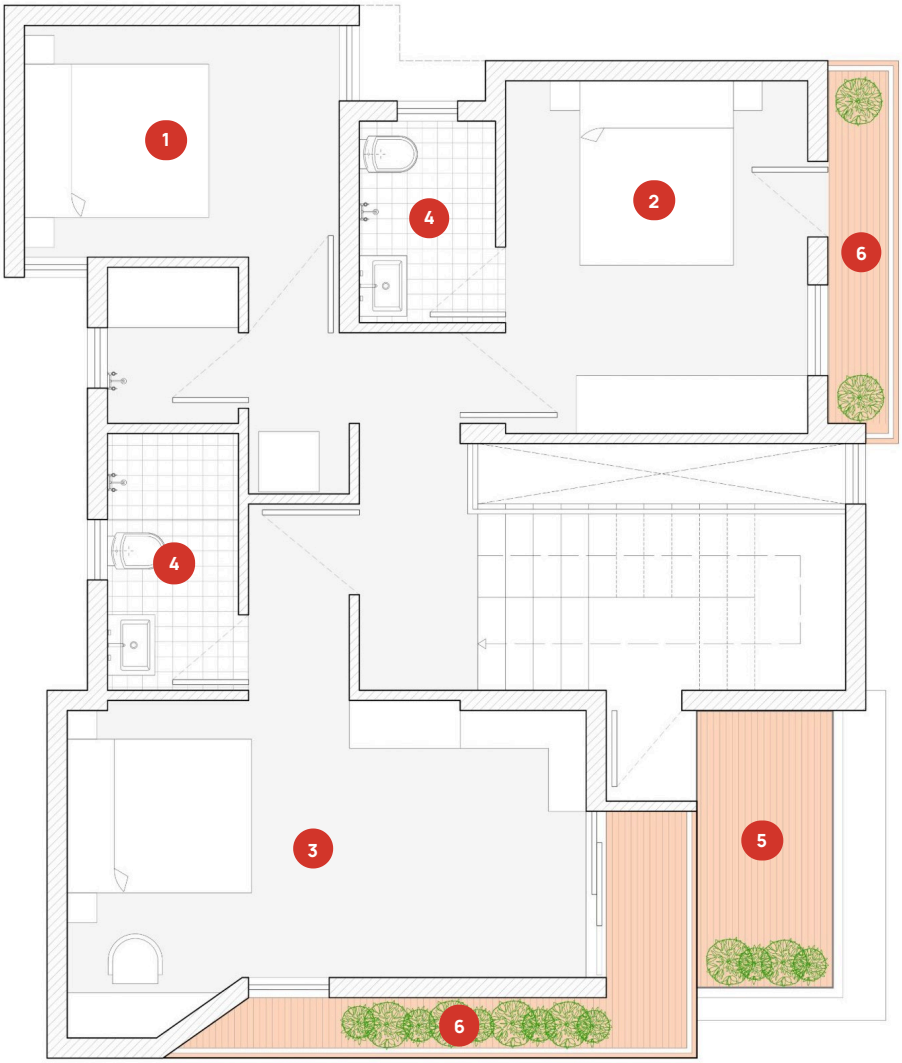

Green on the edges

Planters run along the street corner and the rear of the plot.

PLANTERS

Where the *box* opens.

Three bedrooms, a terrace garden and the wide balcony.

1 Bedroom 1
Rear corner

2 Bedroom 2
Opens to a side balcony

3 Bedroom 3
Behind the Panorama Box

4 Toilet
One beside each room

5 Terrace Garden
Over the car park

6 Balcony
The wide, open view

Pushed out to the view

The box pushes forward, and the terrace garden sits right beside it.

TERRACE GARDEN

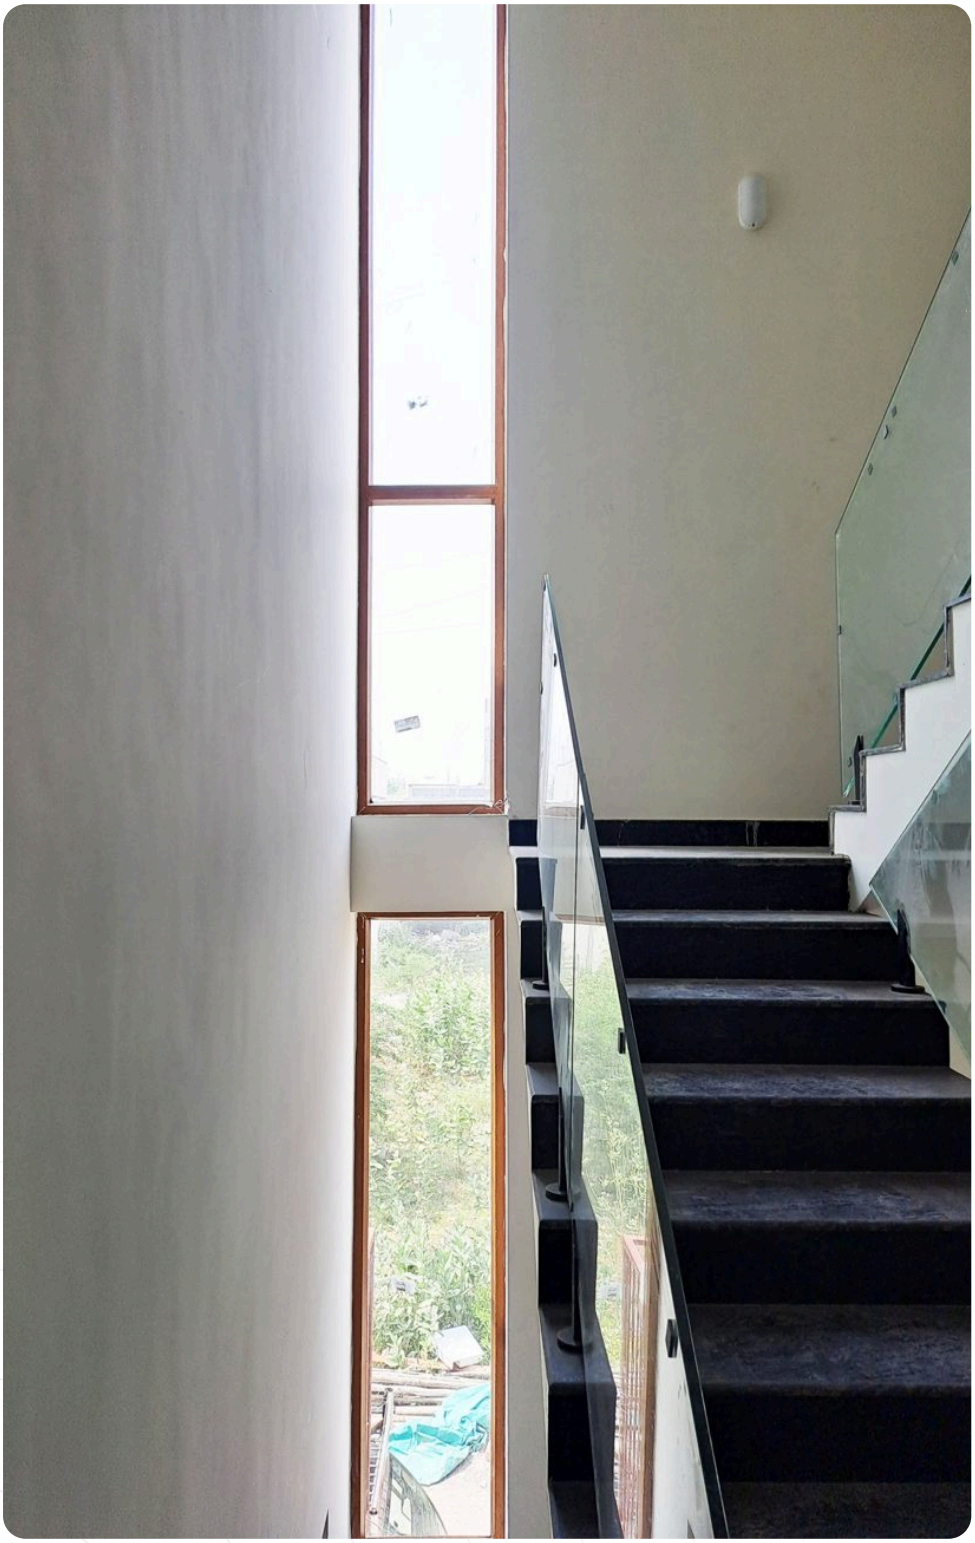

A small *oasis*, on every level.

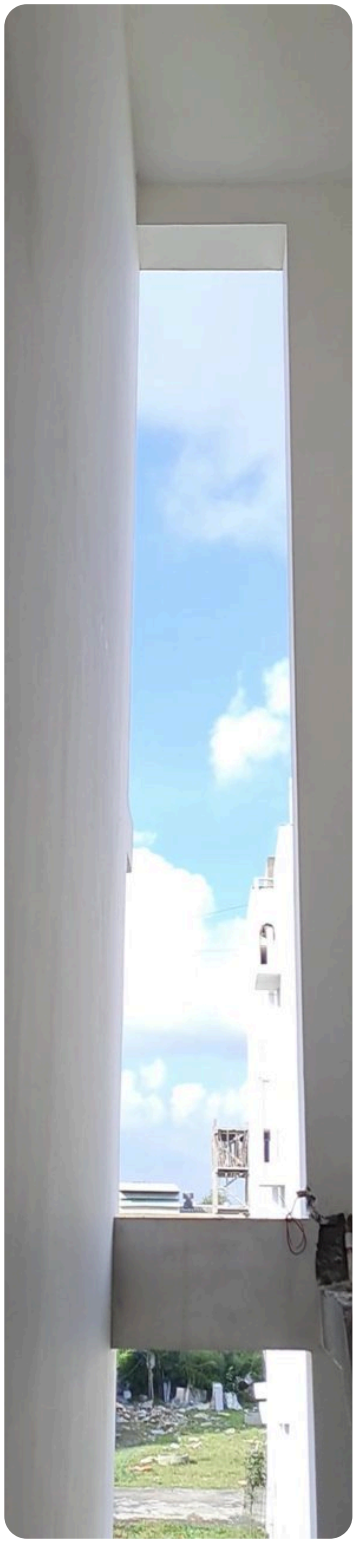

The design displays a play of levels, creating terraces that can be used to house a small oasis.

- **The dark box**
  A dark frame sets off the timber and the glass.
- **The tall wall**
  One slit window runs up the white stair tower.

A slit of *sky* on the stair.

The stair sits against the tall wall. **Narrow windows run up beside it,** bringing north light into the middle of the house.

01 ON SITE: THE FINISHED STAIR 02 THE SAME SLIT, LOOKING OUT

The box takes *shape.*

Site photos from during construction. The overhangs and the tall stair wall are all there before the finishes arrive.

01 FROM THE CORNER 02 INSIDE, BY THE STAIR

Honest *structure.*

Long before the paint, the form already reads: a deep slab, a recessed box and one tall wall.

From drawing to *corner.*

Site photos from near completion. The dark box now reads clearly from both roads.

01 THE CORNER 02 FROM DOWN THE ROAD

The brief, *delivered.*

A dark frame, a wide glass balcony and a terrace beside it, all facing the corner.

We don't design.
We solve.
